

**Yunique** PLM

**Mobility**

**A powerful management tool when you're on the go.**

**Get the power of YuniquePLM in the palm of your hand.**

As apparel retailers become increasingly mobile so too must their enterprise software systems. Gerber Technology's YuniquePLM system delivers robust PLM functionality from the office or on the go. Information created at the office can be browsed globally from standard mobile devices like smartphones and tablets.

**Communicate securely in real time.**

Need to convey information from a fit session at the factory? No problem. Input comments on the spot to communicate the details to colleagues. Need to distribute RFQ's? With YuniquePLM, you can send multiple RFQ's at the same time. Need to collaborate with buyers on a line sheet? You've got it. Each sales group can utilize their custom line sheets or dynamically create new ones while working side by side with individual buyers.

YuniquePLM makes it easy to share, review and edit information with colleagues – all in real time. Capture critical information quickly and securely for improved productivity and informed decision making.
