Flexible, Affordable Pattern Design, Grading, Marker Making and Production Planning Software

FOR DECADES, THE WORLD’S LEADING APPAREL COMPANIES HAVE RELIED ON ACCUMARK® SOFTWARE TO SATISFY THEIR MOST DEMANDING PRODUCTION REQUIREMENTS. ITS ROBUST PATTERN DESIGN, GRADING, MARKER MAKING AND PRODUCTION PLANNING FUNCTIONALITY CAN HELP AUTOMATE THE TASKS YOU PERFORM EVERY DAY.

BY INCREASING YOUR PRODUCTIVITY, PROMOTING GLOBAL COLLABORATION AND ACCELERATING TIME TO MARKET, ACCUMARK PROVIDES A SIGNIFICANT COMPETITIVE ADVANTAGE.

AND NOW THIS INNOVATIVE SOFTWARE IS AVAILABLE AS A SUBSCRIPTION, WHICH MEANS GREATER FLEXIBILITY AND AFFORDABILITY, WITH NO LONG-TERM COMMITMENT.

Accelerate pattern design.
- Use your library of existing blocks to create new styles and achieve consistent fit across season.
- Rely on the bookmarking feature to track original pattern and compare revisions.
- Prepare production patterns with easy-to-apply seam finishes.
- Edit a single point, an entire seam or a complete garment using advanced selection tools.
- Easily add fullness, pleats and darts to create complex styles.
- Add and edit images to your pattern pieces to drive your digital printing process.
- Create your bill of materials directly from patterns and share with PLM.

Simplify grading.
- Grade multiple pattern pieces simultaneously.
- Directly control grading of line lengths for a single edge or seam.
- Grading updates automatically as pattern changes are made, eliminating the need to re-grade pieces after modifications.
- Software analyzes pattern characteristics and automatically applies intelligent calculations to perform fast, accurate grading.
- Share graded measure charts directly to PLM.
- With pre-saved size code tables and alteration rules, AccuMark creates made-to-measure garments from basic sizes.

Accelerate marker making and maximize material utilization.
- Easily generate markers with required production quantities, material widths, fabrics, colors and sizes.
- Import orders from your ERP system and process automatically with batch processing.
- Output files to graphics programs for sublimation printing.
- Track critical information like material utilization and costs in all stages of production.
- Capitalize on your existing library of markers to accelerate piece placement in markers.
- Enter fabric weight to calculate material costs more accurately, particularly with knit fabric.
Enhance communication with colleagues and suppliers.

- Transfer pattern and marker data to Gerber’s YuniquePLM™ product lifecycle management software or your ERP system.
- Harness greater flexibility to import non-AccuMark file formats.
- Customize and export reports in standard formats such as Microsoft® Excel®.
- Quickly create images of patterns and markers to use in tech packs.
- Add annotation to individual pieces in any language to visually communicate pattern details.

Integrate seamlessly.

AccuMark provides seamless integration with Gerber’s automated spreading and cutting systems for more effective work order management.

AccuMark generates a barcode that contains the file name, material type and color and number of plies needed for the spread. Spreader and cutter operators can then easily scan the barcode to locate the correct file to be spread and cut.

By integrating information between AccuMark CAD software and Gerber’s spreading and cutting systems, users significantly improve productivity in the cutting room and reduce errors caused by manual data entry.

Subscription advantage.

AccuMark Subscription gives you the best of both everything – powerful software at low monthly rates. This allows companies of all sizes to control their startup costs and respond to peak production times.

Customers using a subscription plan have access to our world-class technical support teams as well as online training through Gerber University.

Optional Hardware Components

Plotters
GERBERplotter™ series high-speed inkjet plotters
- Supports plot widths up to 220 cm (88 in)

Digitizing Workstations
GERBERdigitizer™ with 16-button cursor
- Table size: 111.5 x 152 cm (44 x 60 in)
- Supports input of pieces up to 220 x 1350 cm (86 x 531 in)
- Serial connection required

Silhouette™ Table
- Table size: 123 x 167.5 cm (49 x 66 in)
- Supports input of pieces up to 220 x 1350 cm (86 x 531 in)
- Serial connection required

Optional Software Components
- AccuNest™ automatic marker making software
- AccuScan™ automated pattern digitizing software
- AccuPlan™ automated cut planning software
- AccuMark 3D visualization software
